

ROSETTA STONE PRODUCT CHANGES

To deliver the best language-learning solutions, Rosetta Stone has launched Version 3 in 30 languages. This version includes exciting new benefits such as new speech analysis tools and real-world simulations.

It is easy to tell which Rosetta Stone courses are new; all courses are now identified in the STMS catalog by version number. Please note that the new Version 3 products replace Version 2 products (Levels I and II), that are then no longer available to order. If you have already purchased Version 2 language courses, you may continue to prescribe and assign them.

IMPORTANT!

The assigning of credits has changed for Version 3 products. **For each level of Version 3 language courses completed (Levels 1, 2, or 3), the student is awarded 1 credit.** This is a change from Version 2 where each completed level is awarded 2 credits. For your convenience, these changes are reflected in the updated STMS catalog.

INSTRUCTIONS FOR UPDATING THE STMS CATALOG

IMPORTANT: Please back up your database before beginning the catalog update.

1. Save the CatalogUpdate_July_2009.zip file to the STMS folder. By default the STMS folder is located on your c: drive.
2. Open the STMS program.
3. Restore the CatalogUpdate_July_2009.zip file.
 - Click on FILE | UTILITIES | RESTORE DATA.
 - On the Restore Data screen, select the c: drive and highlight STMS in the box on the right.
 - Highlight CatalogUpdate_July_2009.zip in the left box.
 - Click on the START RESTORE button.
3. Run the update utility program.
 - Click on FILE | UTILITIES | RUN CATALOG UPDATE PROGRAM.
 - At the update screen click on FILE | CATALOG | UPDATE.

Note: The percentage bar will indicate when the update is complete.
